PROFESSIONAL SUMMARY

Detail-oriented Software Engineering student with hands-on experience in debugging, troubleshooting, software testing, and validating system behavior. Strong analytical mindset with a focus on identifying root causes, ensuring reliability, and improving user experience. Currently developing a React and Node.js portfolio application while collaborating with engineering teams in a fast-paced manufacturing environment.

TECHNICAL SKILLS

Languages: C#, JavaScript, Python (basic)

Web: React, HTML, CSS, jQuery, Node.js

Databases: SQL (MySQL)

Tools: Git, GitHub, Visual Studio, VS Code, Jira (academic exposure)

Concepts: Debugging, Software Testing, OOP, API Basics, Data Validation, QA Testing, Bug Tracking

Cloud & Productivity: Google Drive, Google Docs, Google Sheets, Microsoft Office

PROFESSIONAL EXPERIENCE

Automation Engineer – Linamar, Guelph, ON (Nov 2025 – Present)

- Troubleshoot complex automation systems involving software and hardware components.
- Identify root causes of system issues and verify solutions to ensure reliability.
- Collaborate with engineers to diagnose, test, and resolve production problems.
- Monitor system performance and validate improvements to reduce downtime.
- Work with PLCs, robots, cameras, Ethernet/IP communications, and production databases.

Automation Technician – Linamar, Guelph, ON (Mar 2021 – Nov 2025)

- Supported automated systems through troubleshooting and issue resolution.
- Assisted in testing system behavior and verifying fixes.
- Worked closely with engineering teams to improve system performance and stability.

PROJECTS

React Portfolio Website (React, Node.js, HTML, CSS, Vite)

- Developed a responsive portfolio website using React and modern front-end development practices.
- Created reusable components for Home, About, Services, References, and Contact pages.

- Implemented component-based architecture and responsive design.
- Tested, debugged, and refined functionality to improve user experience and reliability.

C# Windows Forms Application (Inventory System)

- Developed an inventory system using C# and OOP principles.
- Implemented data validation, filtering, and search functionality.
- Tested application features and debugged issues to ensure correct behavior.

Web Form Validation Project

- Built a user registration form using HTML, CSS, JavaScript, and jQuery.
- Implemented input validation using regular expressions.
- Tested edge cases and resolved front-end issues to improve reliability.

SQL & Database Work

- Designed and queried relational databases using SQL.
- Created queries involving joins, filtering, and validation.
- Tested queries and resolved data-related issues.

EDUCATION

Software Engineering Diploma (In Progress) – Centennial College

Electro-Mechanical Engineering Technology (Advanced Diploma – Honours) – Centennial College (2020)

Bachelor of Engineering – Digital Systems & Robotics – Technology University of Mexico (2017)

STRENGTHS

- Strong analytical and problem-solving skills
- Attention to detail and focus on quality
- Ability to communicate technical concepts clearly
- Fast learner with adaptability to new tools and technologies
- Passion for testing, finding bugs, and improving software quality
